Click on Create a new citation to go to cite your next article.

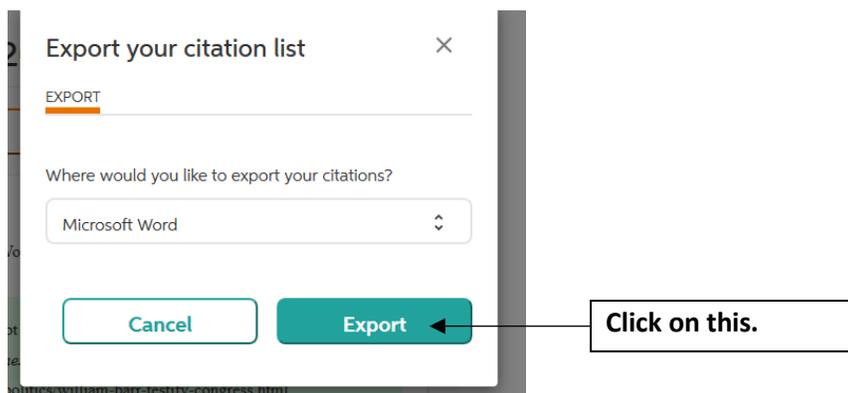

Citation to look over.

- Then, repeat steps #3-6 until you have created a works cited list for all of your sources cited for the Works Cited Page in your essay.
- Next, export your works cited page list as a Word document by using the dropdown menu on **Export**, and clicking on **Microsoft Word**:

*Do not choose **Copy All** because the formatting may change; you can click on **Save**, but you must create a free easybib.com account, and you are welcome to do that.

- Then, click **Export**:

- Save the Word document to your computer, OneDrive, a USB drive, etc.
- Double-check your works cited page to make sure everything is accurately spelled and formatted; make any necessary revisions—you can do this on the Word document.
- Copy the works cited page and paste it into your essay. The works cited page comes after the conclusion paragraph.
