Some General Reminders about the APA System of Documentation

- References lists only contain sources directly mentioned in your work that are recoverable (published in some way). Don’t include personal communications such as interviews, email messages, and letters on the References list. However, **do** include them in the document.
- References entries are **alphabetized by the last name of the first listed author**. If there is no author, the entry is alphabetized by the first major word of the title (not counting a, the, an, etc.).
- References entries are **double-spaced within and between entries** and are not numbered.
- References entries use a **hanging indent** pattern where the first line extends all the way to the left margin and each subsequent line is indented five spaces.
- References lists use title capitalization for names of magazines, newspapers, journals, and websites. Title capitalization means capitalizing all major words in the title not counting words such as a, the, an.
- References lists use sentence capitalization for all other titles (chapters, articles, books). Sentence capitalization means capitalizing only the first word of the title, any proper nouns, and any word that immediately follows a colon ( : ).

A Note about Website Articles and Dates

Always include the date of an article if you can find one printed on the website article. If you cannot find a printed date, put (n.d.) following author’s name (n.d. means “no date”), and include the date you accessed the article. If the article already has a date printed on it, you do not need to include the date you accessed the article unless the article changes frequently, such as a Wikipedia article.

**Website Article No Named Author**

Title of article. (year, month day of publication). *Title of Website*. Retrieved from URL [no period at the end]

**Website Article with Corporate, Educational, Organization, or Government Author**

Author (corporation, educational institution, organization, or government author). (year, month day of publication). Title of article. *Title of Website*. Retrieved from URL [no period at the end]

**Website Article with One Author**

Author, A. A. (year, month day of publication). Title of article. *Title of Website*. Retrieved from URL [no period at the end]

**Website Article with Two to Six Authors (list all named authors in the order they appear on article)**
