### Semicolons and Colons

#### Definitions and Examples of Semicolons (;)

1. A semicolon **separates two complete sentences** from each other much like a period/Capital letter or a comma/coordinating conjunction (for, and, nor, but, or, yet, so). Writers use semicolons when the two sentences are seen as particularly related to each other. Often, writers will put conjunctive adverbs (however, therefore, hence, consequently, essentially) in between the two sentences.

- I watched *The Daily Show* until 3:30 a.m.; **therefore**, I am absolutely exhausted today.
- A buffet can be a terrific bargain; **however**, the focus is probably on quantity, not quality.
- Owning pets offers many health benefits; **consequently**, pets can lower blood pressure and anxiety.

2. A semicolon is used when the writer presents a series of items that already have commas in them.

- I have lived in Council Bluffs, Iowa, Dubuque, Iowa, Ames, Iowa, Groton, Connecticut, Morris, Minnesota, Anchorage, Alaska, Urbana, Illinois, and Champaign, Illinois.  
>>>In this example, the actual city/state divisions are unclear because of all the commas.
- I have lived in Council Bluffs, Iowa ; Dubuque, Iowa ; Ames, Iowa ; Groton, Connecticut ; Morris, Minnesota; Anchorage, Alaska; Urbana, Illinois; and Champaign, Illinois.  
>>>In this example, the semicolons make the divisions between cities/states more clear.

#### Definitions and Examples of Colons (:)

A colon is primarily used to introduce a list of items. When a colon is used, however, an entire sentence must precede the colon.
